

Madhava Maala Wood Carvings

Wood Carving - a traditional craft form of Srikalahasti and Madhavamaala region in Andhrapradesh has its roots in ancient temple architecture. The wood carvers of this region have preserved this craft and are renowned for their intricately majestic temple doors and door frames, statues and architectural fixtures. The pandemic this year; has been a challenging period for this traditional skill force - rendering it inaccessible to dynamic work.

Niranjan Jonnalagadda, a 4th generation kalamkari artist, of international acclaim and from Srikalahasti, realizing the need of hour - infused his own artistic versatility into This craft and encouraged these skilled craftsmen to create objects of home decor.

This initiative of JNkalam Creations aims to provide sustainable livelihoods, revive crafts and bring these to an expansive platform of visibility in the New Normal.

All these products are handmade, and child labour free.

Each purchase promotes economic survival of families and Revival of traditional Wood craft.
